# *Flowerburst Red Shades*

*Achillea millefolium*

*Germination temperature*  
17-20°C

*Days to germinate*  
3-4 days

*Stem length*  
60-75 cm

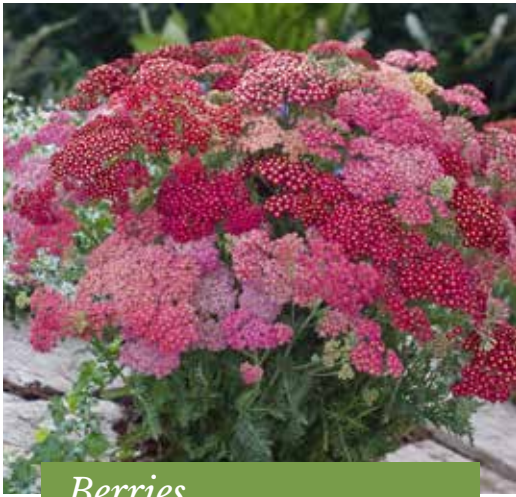

*Red Shades*  
EACA02

Flowerburst Red Shades is an eye-catching mixture of red, rose, pink and purple shades.

Flowerburst adds a warm, welcoming splash of colour in the garden over a long period.

As an attractive hardy perennial, it survives a cold winter and flowers every year unless exposed to extreme hot and humid conditions in summer.

Attracts butterflies and beneficial insects.

*Berries*  
EACA03

Summer Series is a hardy perennial which flowers the first year from seed and will bloom continuously until heavy frost.

Flowers faithfully year after year.

Remove old flowers to encourage new blossoms.

# Summer Series

*Achillea millefolium*

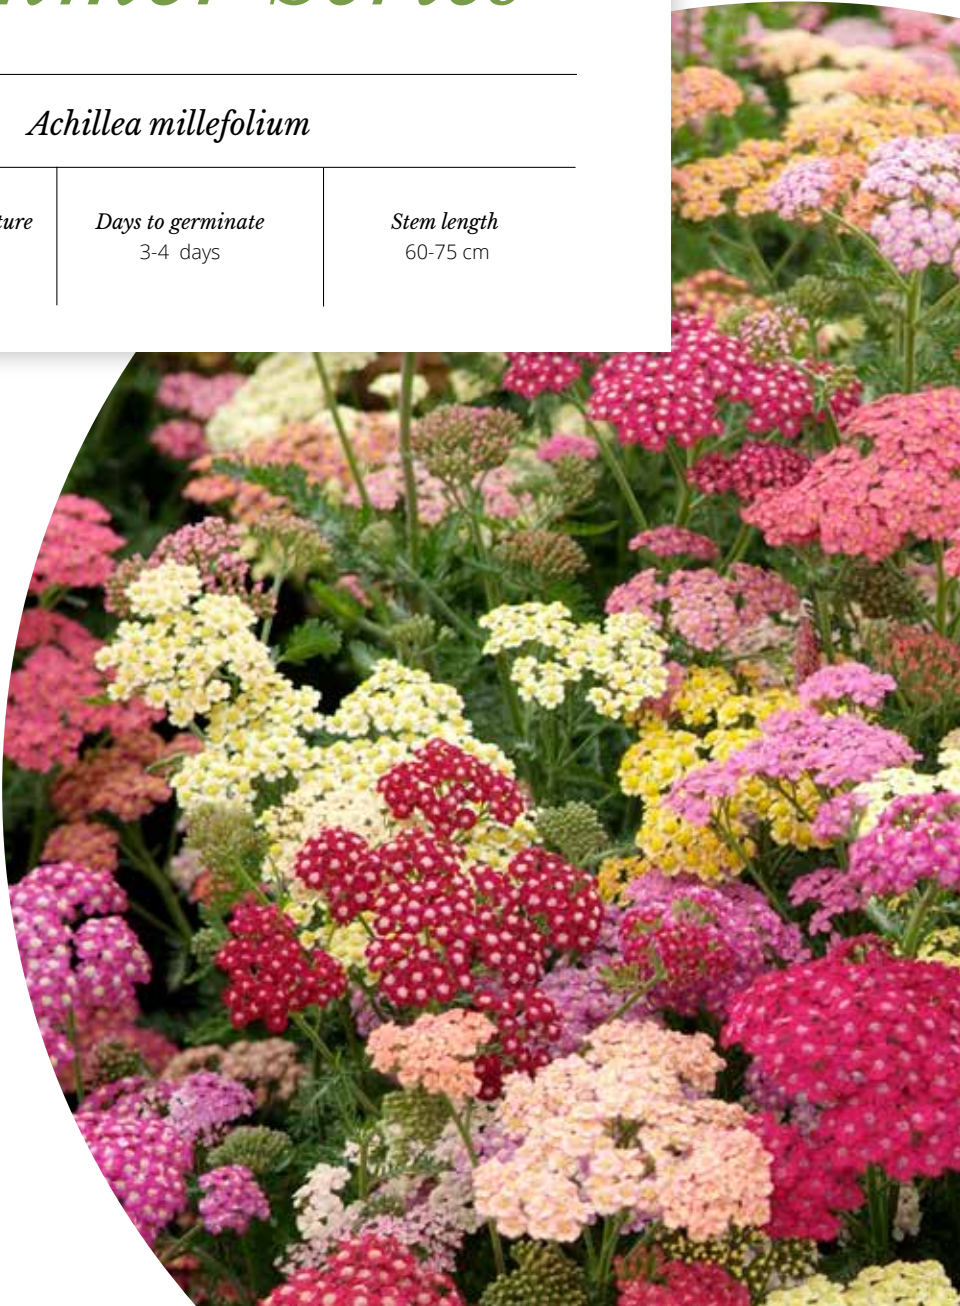

*Germination temperature*  
17-20°C

*Days to germinate*  
3-4 days

*Stem length*  
60-75 cm

*Pastels*  
EACA04

# *Arizona Series*

*Agastache x hybrida*

Will flower continuously throughout the season.

*Germination temperature*  
20-22°C

*Days to germinate*  
5-7 days

*Plant height*  
20-25 cm

Arizona is a beautiful compact and floriferous hybrid series, featuring loose spikes of mint and lemon-scented, tubular flowers on dense spikes appearing throughout the summer and into autumn.

Grey-green foliage.

Fast crop from spring sowing.

Easy maintenance and suitable for dry and sunny conditions.

*Sandstone*  
FATA22

*Sun*  
FATA21

*Sunset*  
FATA23

*Apricot*  
FHAA07

# *Spring Celebrities Series*

*Alcea rosea*

Most compact variety in the market

*Germination temperature*  
15-20°C

*Days to germinate*  
7-10 days

*Plant height*  
60-80 cm

The Spring Celebrities series was first introduced in 2009 and now carries ten colours.

The attractive 'cottage garden shades' of Soft Pink, Lilac, Lemon, Carmine Rose, Purple, White and Crimson are also stunning when combined in mixes.

Good basal branching and flowering from May to frost.

Ideally suited for containers as well as in beds and borders.

# Fiona

## *Fiona F1 Series*

*Begonia semperflorens*

A powerful colour blast in gardens or landscapes, but also in containers

*Germination temperature*  
22-24°C- Light required

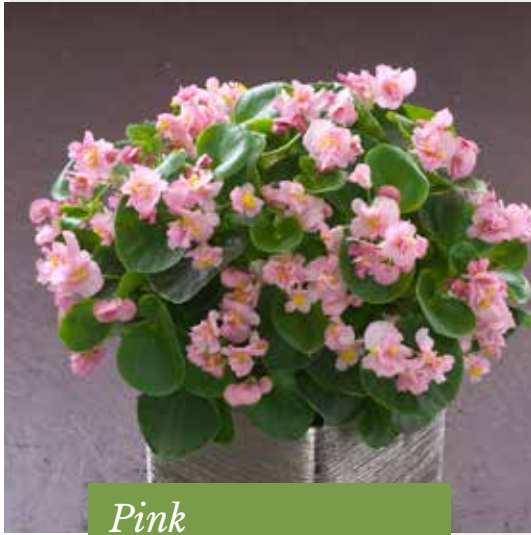

*Days to germinate*  
7-10 days

*Plant height*  
20-25 cm

High degree of uniformity, early upright flowering and self-cleaning in semidouble type.

Attractive flowershape in vibrant colours with an excellent through-season performance.

Fiona Red has been awarded a Fleuroselect Gold Medal in 2019.

*Pink*  
FBG204

*Prince*  
FHB612

*Queen*  
FHB611

# *Coral & Peacock F1 Series*

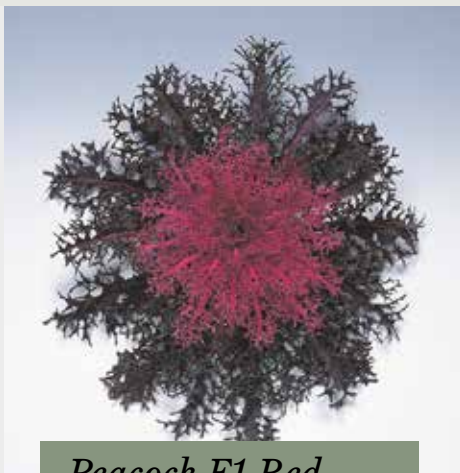

*Brassica oleracea*

Feather leaved type - deeply serrated carrying a larger head than other types

*Germination temperature*  
20-25°C

*Days to germinate*  
4-6 days

*Stem height*  
20-30 cm

*Peacock F1 Red*  
FHB621

Lively plants with thick, sturdy stems.

The plants can withstand frosts and freezes and work well in wet conditions as their open feathery leaves are less likely to trap and hold water than fringed- and round-leaved types.

*Peacock F1 White*  
FHB622

*New*

*Deep Red*  
FHB757

*New*

*Pink*  
FHB758

*Red*  
FHB755

# *Crystal F1 Series*

*Brassica oleracea*

Dwarf shiney type

*Germination temperature*  
20-25°C

*Days to germinate*  
4-6 days

*Stem height*  
15-25 cm

*Snow*  
FHB756

## *Kamome F1 Series*

*Brassica oleracea*

A joy for winter garden

*Germination temperature*  
20-25°C -

*Days to germinate*  
4-6 days

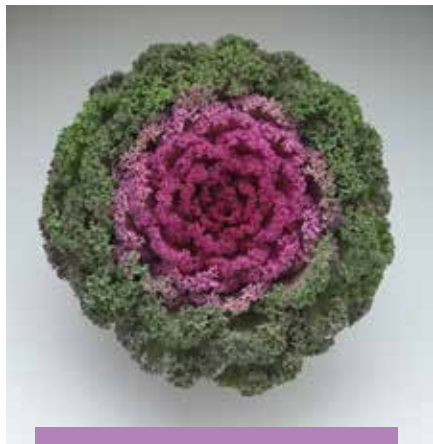

*Plant height*  
15-25 cm

The edges of all leaves are finely ruffled.

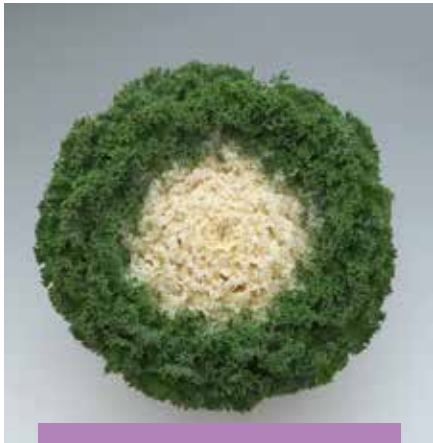

Kamome can withstand frost and is suitable for outdoor cultivation.

One of the few series that can be enjoyed in a winter garden.

# *Takion F1 Series*

*Campanula persicifolia*

Suitable as container plant

*Germination temperature*  
15-20°C

*Days to germinate*  
15-20 days

*Plant height*  
40-60 cm

Takion has a very good basal branching habit with 6-8 sturdy stems of long-lasting bell-shaped flowers in Spring.

Very hardy and survives at least up to -20°C.

Makes an excellent garden perennial as well as a beautiful pot crop.

CANNOVA

Color Botanica

# Cannova<sup>®</sup> F1 Series

*Canna generalis*

Color Botanica

*Germination temperature*  
20-30°C

*Days to germinate*  
10-15 days

*Plant height*  
60-75 cm

*Yellow*  
FCAA02

Cannova is the first F1 hybrid series on the market.

The Cannova is a Canna series perfectly suited for warm and cooler summer climates.

With its outstanding garden performance and profuse flowering until the first frost, Cannova adds a tropical touch to any outdoor space.

Cannova comes in many bright flower colours and bronze- and green-leaved varieties.

*Orange*  
FCA404

# *South Pacific F1 Series*

*Canna generalis*

Well suited for both landscape and container use

*Germination temperature*  
20-30°C

*Days to germinate*  
10-15 days

*Plant height*  
60-75 cm

*Rose*  
FCA402

*Scarlet*  
FCA402

South Pacific is compact in habit, more vigorous, more uniform and has more basal branching in comparison to other cannas.

The vibrant colours of the flowers are very attractive that contrasts nicely with the bright green foliage.

Being grown from seed, there is less chance of succumbing to disease.

Orange(2018) & Scarlet(2013) were awarded as AAS Winner.

# *Tropical series*

*Canna generalis*

Germination info: Temperature fluctuation is preferable

*Germination temperature*  
20-30°C

*Days to germinate*  
10-15 days

*Plant height*  
60-75 cm

Tropical Bronze Scarlet, released in 2010, is the first bronze-leaved Canna from seed.

Canna Tropical series is a seed product and is extra dwarf.

Production period is fast and plants are characterized by readily producing offsets, making full finished pots with tremendous consumer appeal.

Prefers warm and humid conditions over 25°C.

20-25°C

*Days to germinate*  
7-9 days

*Plant height*  
20-30 cm

*Red*  
FKT241

*Yellow*  
FKT243

Armor series show attractive large flower heads in bright colours on robust plants with lush foliage.

Ideal for hot summer gardens as well as pot use.

Yellow is relatively compact in the series.

# Snowland

*Chrysanthemum paludosum*

*Germination temperature*  
15-20°C

*Days to germinate*  
5-10 days

*Plant height*  
20-30 cm

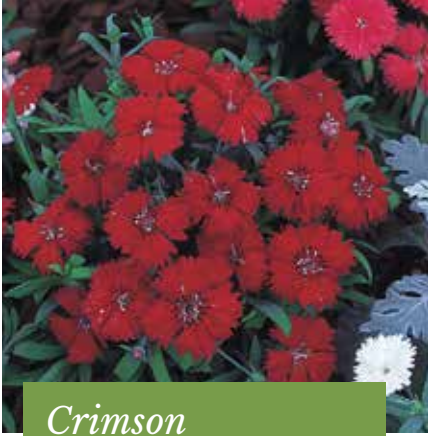

Snowland has a uniform plant habit with large flowers that are bigger than other paludosum type Chrysanthemums.

Under warm temperatures and long-day conditions they produce many flowers, under cool temperatures and short-day conditions, they produce many branches.

# Bravado

*Echinacea purpurea*

*Germination temperature*  
18-20°C

*Days to germinate*  
7-10 days

*Plant height*  
80-120 cm

Bravado is a first-year flowering, hardy perennial plant flowering from summer to early autumn.

A lovely garden plant, attracting a lot of butterflies.

Bravado can also be used as a cut flower and can be marketed as ornamental discs when petals are removed.

# Charity mix

*Erysimum cheiri*

*Germination temperature*  
18-22°C

*Days to germinate*  
8-10 days

*Plant height*  
20-30 cm

Charity is a unique wallflower that flowers in both autumn and spring and can handle frost as low as -4°C without damage.

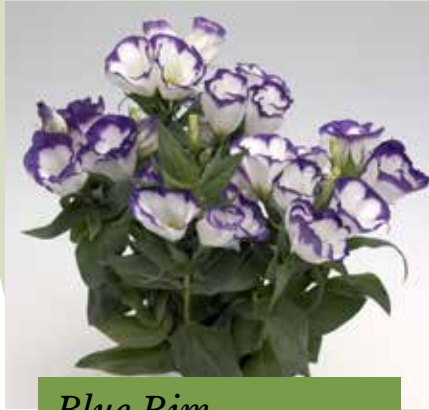

The compact plants are excellent for pot- and garden use and its sweet fragrance greatly adds to consumer appeal.

---

## *Matthiola incana*

---

A dwarf variety with hairy leaves

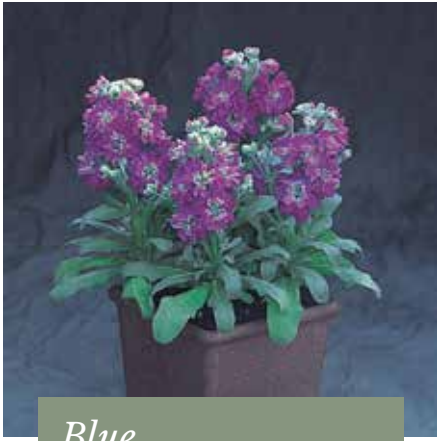

---

<i>Germination temperature</i> 18-21°C	<i>Days to germinate</i> 4-6 days	<i>Plant height</i> 15-25 cm
---	--------------------------------------	---------------------------------

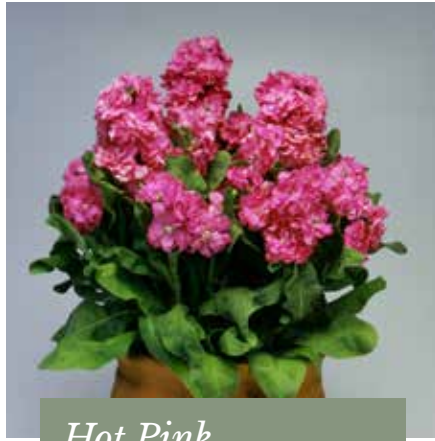

An extremely early and long flowering blend of eight distinct colours ideal for the border or in pots.

In the garden, it has a branching habit with multiple flower spikes, whilst in pots, it's compact with a single superb flower spike. Magnificently fragrant with a sweet and spicy clove scent.

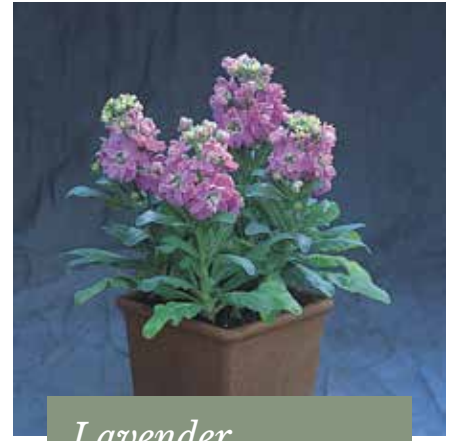

The double flower plant ratio of Red and White is less than the remaining colours in the series. Seedlings are selectable for doubleness.

FPT641

A multiflora Petunia from seed with a novel dome habit that flowers prolifically on mounding, well branching plants.

Trilogy F1 series brings uniformity across all colours, a controlled habit for less tangling, and less day length sensitivity than other mounding Petunias.

Young plant to flower	5 weeks (sowing to flower time is 11 - 12 weeks)

\* The information contained in this leaflet has been compiled with utmost care. However, actual results are dependent upon environmental conditions and local practices that may affect variety characteristics and performance

# *Evening Scentsation F1*

*Petunia x hybrida*

Trailing type | Evening Scentsation's fragrance has notes of hyacinth, sweet honey and rose

*Germination temperature*  
22-25°C - *Light required*

*Days to germinate*  
5-10 days

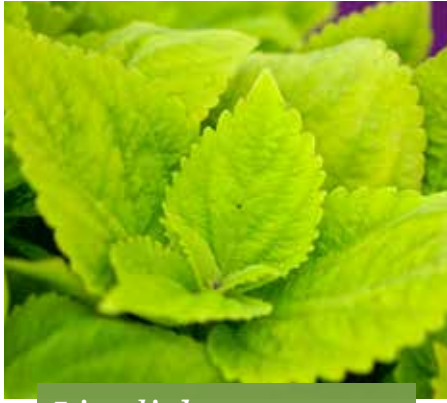

*Plant height*  
10-20 cm

FPT639

Evening Scentsation is the first petunia which earned an AAS regional award for its lovely fragrance and stunning colour.

As its name implies, Evening Scentsation's fragrance is stronger in the evening hours, and can be experienced throughout the day as well.

*Limelight*  
FCLA02

*Magma*  
FCLA03

# *Giant Exhibition Series*

*Plectranthus scutellarioides (Coleus)*

The Giant Exhibition Series perfect in the shade garden and are also fabulous in a mass planting!

*Germination temperature*  
20-22°C - *Ligh required*

*Days to germinate*  
4-6 days

*Plant height*  
25-35 cm

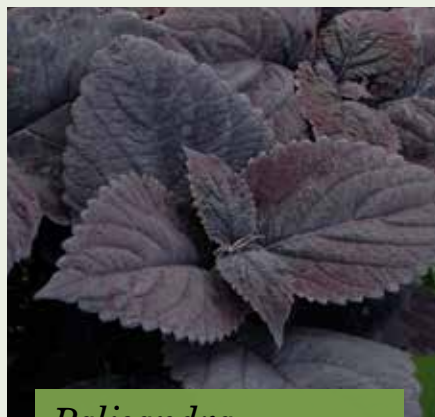

Extra-large leaves attract attention in the garden, and also makes it a great house plant.

From sowing to matured plant in approximately 13 weeks.

To enhance the beauty of the foliage, remove any flower spikes.
