*Allium cepa L.*

---

Early long day onion for Central- and South Europe

---

*Sow* early spring

*Harvest* summer

*Market* fresh, processing

We offer the earliest available spring sown onions in this range. The onions are known for their good skin quality, their attractive colour and high yield.

Earliness is guaranteed due to their uniformity and fine necks.

**Reks F1**  
*Extra early long day*

Reks has a rapid plant development. This very early variety has an impressive skin quality that allows machine harvesting. Also available as set onion.

TYPE EXTRA EARLY LONG DAY | MARKET FRESH | MATURITY VERY EARLY | LATITUDE RANGE 35°- 55° | AVERAGE SIZE 50-70 MM | BULB SHAPE ROUND | SKIN COLOUR BROWN

**Calvera F1**  
*Extra early long day*

Recommended for Central - and South Europe. Impressive skin quality and yield for its earliness. The thin neck makes harvesting and drying easier.

TYPE EXTRA EARLY LONG DAY | MARKET FRESH | MATURITY VERY EARLY | LATITUDE RANGE 35°- 55° | AVERAGE SIZE 50-70 MM | SKIN COLOUR BRONZE BROWN | BULB SHAPE ROUND

**Verdon F1**  
*Extra early long day*

Slightly later than Reks and has impressive yield for its earliness. The variety grows easy and very vigorous with large round bulbs.

TYPE EXTRA EARLY LONG DAY | MARKET FRESH | MATURITY VERY EARLY | LATITUDE RANGE 35°- 50° | AVERAGE SIZE 50-70 MM | SKIN COLOUR LIGHT BROWN

**Takstar F1**  
*Early long day*

Matures a few days earlier than Takmark and grows slightly more vigorous. Used as bunching onion in Central Europe. Also available as set onion.

TYPE EARLY LONG DAY | MARKET FRESH, PROCESSING | MATURITY EARLY | LATITUDE RANGE 45°- 50° | AVERAGE SIZE 50-70 MM | BULB SHAPE ROUND | SKIN COLOUR GOLDEN BROWN

**Comae F1**  
*Early long day*

New introduction in the early long day segment. Good skin quality, high yield and early. Matures simultaneously with Takstar.

TYPE EARLY LONG DAY | MARKET FRESH | MATURITY EARLY | LATITUDE RANGE 45°- 50° | AVERAGE SIZE 50-70 MM | BULB SHAPE ROUND | SKIN COLOUR BRONZE BROWN

**Takmark F1**  
*Early long day*

Reliable, stable and good skin. Fine neck, upright plant habit and excellent uniform grading. Also available as set onion.

TYPE EARLY LONG DAY | MARKET FRESH | MATURITY EARLY | LATITUDE RANGE 45°- 50° | AVERAGE SIZE 50-70 MM | BULB SHAPE ROUND | SKIN COLOUR SHINY BROWN | RESISTANCES IR: FUSARIUM

*Superon F1*  
*Early long day*

Forms a strong root system and a vigorous plant. Adaptable for various growing conditions. The fine neck makes easy and fast drying possible. Strong in single centres. Excellent skin quality.

TYPE LONG DAY | MARKET FRESH, MEDIUM STORAGE |  
MATURITY EARLY | LATITUDE RANGE 45°- 50° | AVERAGE  
SIZE 60-80 MM | BULB SHAPE ROUND | SKIN COLOUR  
SHINY BROWN

*Rubillion F1*  
*Early long day red*

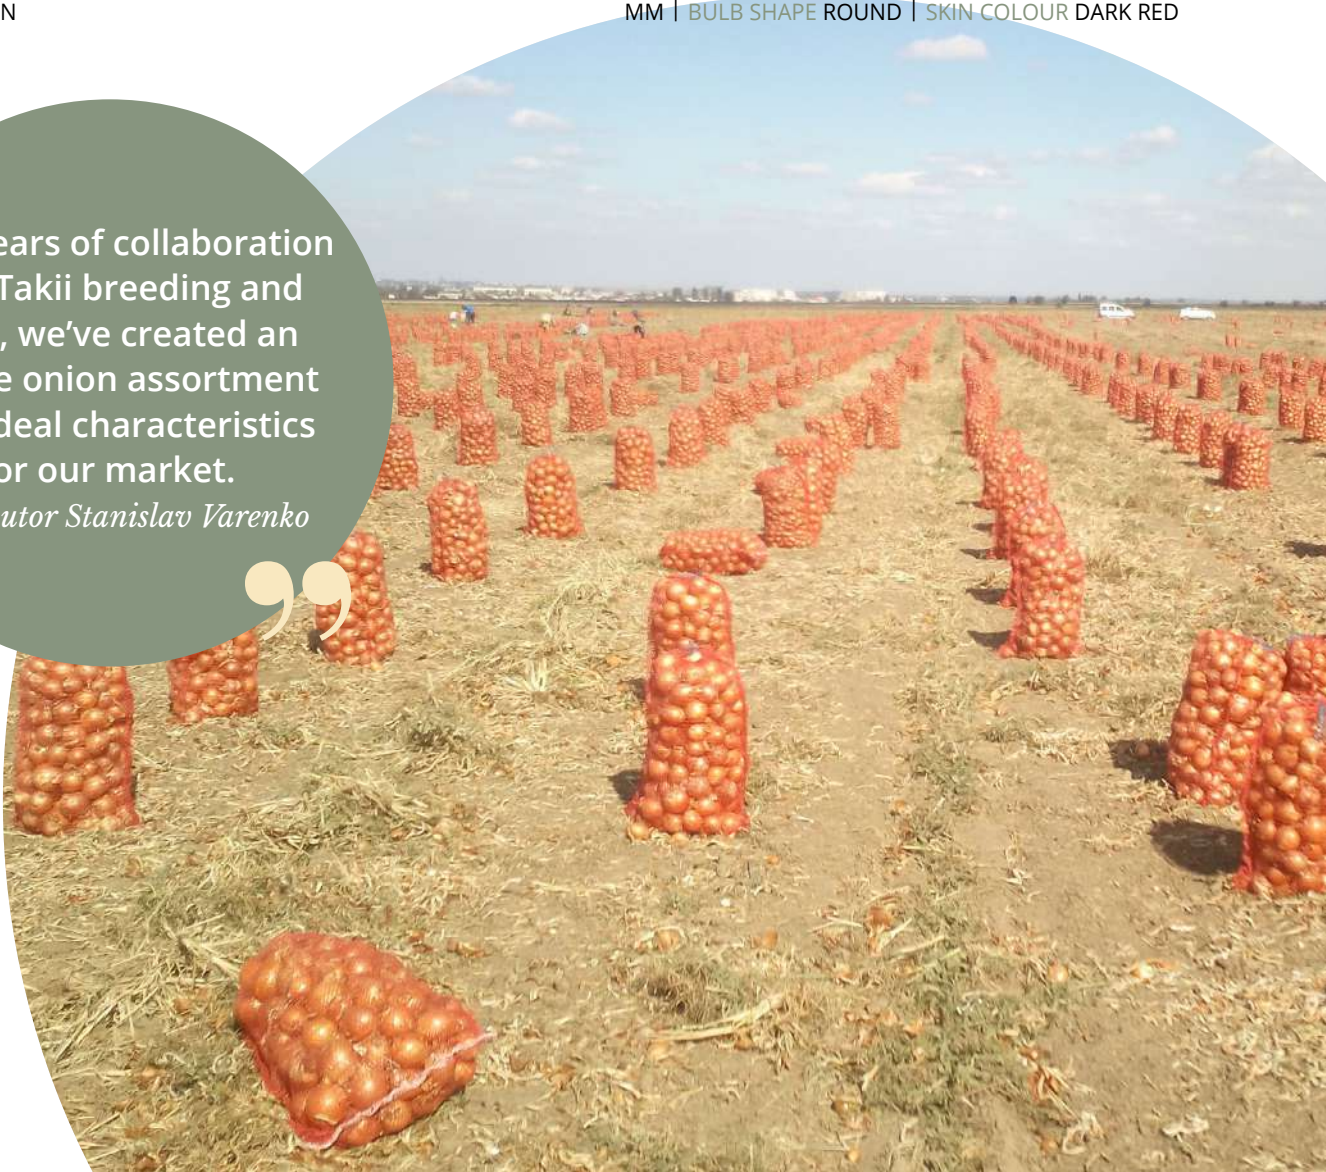

Very uniform variety with strong growing habit, high percentage of single centres and excellent internal colouration after harvest. This makes it possible to be very early in the market with red onions.

TYPE EARLY LONG DAY | MARKET FRESH | MATURITY  
EARLY | LATITUDE RANGE 45°- 50° | AVERAGE SIZE 50-70  
MM | BULB SHAPE ROUND | SKIN COLOUR DARK RED

In 15 years of collaboration with Takii breeding and sales, we've created a unique onion assortment with ideal characteristics for our market.

*Allium cepa L.*

---

Rijnsburger onion for North-West Europe

---

*Sow* spring

*Harvest* summer - autumn

*Market* storage

---

After many years of breeding, Takii introduces an assortment with North European storage onions.

The varieties excel in their quality and early development.

**Ruby Star F1**  
*Onion Rijnsburger*

Earliest maturing red onion for long storage in North Europe. The variety grows strong in early season and bulbing starts right after the longest day. Uniform, fine neck and good yield.

TYPE RIJNSBURGER | MARKET LONG STORAGE | MATURITY EARLY | LATITUDE RANGE 45°-55° | AVERAGE SIZE 50-70 MM | BULB SHAPE ROUND, SLIGHTLY FLAT | SKIN COLOUR RED

**Novista F1**  
*Onion Rijnsburger*

An early maturing high quality onion. Strong vigour and early development resulting in a high number of plants/ha. The fine neck and its earliness make Novista very suitable for the early export market.

TYPE RIJNSBURGER | MARKET LONG STORAGE | MATURITY EARLY | LATITUDE RANGE 45°-55° | AVERAGE SIZE 50-70 MM | BULB SHAPE ROUND, SLIGHTLY FLAT | SKIN COLOUR YELLOW BRONZE

**Bruce F1**  
*Onion Rijnsburger*

Very uniform and erect plant habit which allows good ventilation in the crop. Early growth and development with medium late maturity. High dry matter secures good storability and makes it suitable for industry.

TYPE RIJNSBURGER | MARKET LONG STORAGE | MATURITY MEDIUM EARLY | LATITUDE RANGE 45°- 55° | AVERAGE SIZE 60-80 MM | BULB SHAPE ROUND | SKIN COLOUR YELLOW BRONZE
